Test Case 14: Remove Items from inventory/catalog

Allows authorized staff to remove an item from the catalog making it unavailable for customer purchase.

Input	Enter Option: 3 Enter the Item ID: 4
Expected Output	item deleted ===== Available Items =====
Actual Output	item deleted ===== Available Items =====

The screenshot shows a code editor with a file named `shmall.py` open. The code is a Python script for a shopping mall inventory system. The script includes a menu with options 1 through 10. Option 3 is selected, which corresponds to the 'Remove Item' function. The user enters the item ID '4'. The script outputs 'item deleted' and then displays the 'Current Inventory' list. The inventory list shows items with their IDs and names, separated by dashed lines. The items listed are: ID: 3, Name: USB-C Cable; ID: 1, Name: Wireless Mouse; ID: 5, Name: fvbg; ID: 2, Name: Mechanical Keyboard; ID: 8, Name: e; ID: 9, Name: frgt; ID: 23, Name: item; ID: 34, Name: edwfr; ID: 321, Name: Test; ID: 456, Name: rftg; ID: 12345, Name: TestItem. The script ends with the prompt '1. View Inventory'.

Input	=== CEO Portal === 1. Generate Daily Reports 2. Generate Monthly Reports 3. View Reports 4. Exit Enter choice: 2 Enter year (YYYY): 2015 Enter month (1-12): 3
Expected Output	Monthly report generated: reports/monthly_report_2015_03.txt
Actual Output	Monthly report generated: reports/monthly_report_2015_03.txt

The screenshot displays a VS Code editor with a file named `shmall.py`. The code contains a SQL query to check for a user with the role 'ceo'. Below the code, the terminal window shows the execution of the program. The user is presented with a menu where they select '3. View Reports'. They are then prompted to enter a choice (they enter 2), a year (they enter 2015), and a month (they enter 3). The program outputs 'Monthly report generated: reports/monthly_report_2015_03.txt'.

```

102 cursor.execute("SELECT COUNT(*) FROM users WHERE role='ceo';")
103 count = cursor.fetchone()[0]
104
105 if count == 0:
106     # Default credentials (you can change them)
107     ceo_id= 7989
108
109 add_default_ceo_if_missing() if count == 0

```

Run main x shmall x

```
